

Aerospace testing

– NDT inspection of aircraft and aircraft components

FORCE Technology has more than 30 years experience from NDT inspection within the aerospace industry. Our staff are certified NDT technicians for aircraft and aircraft components.

Our services

We perform NDT inspection by means of thermography (IRT), bond test, ultrasonic (UT/UTPA), eddy current (ET), X-ray (RT), magnetic particle (MT), penetrant (PT), and visual inspection (VT).

Aircraft & helicopters

We work with most aircraft (Airbus, Boeing, SAAB, Jet stream, Fokker, Cessna etc.) and Helicopters (Bell, Robinson R44 etc.).

Certificates & approvals

- Certified by the Swedish Transport Agency according to EASA PART-145, SE.145.0007 (D1 Non destructive Testing).
- Cessna (Authorized Independent Cessna NDI Facility, certificate No C-154).

Locations

We are located at Arlanda Airport (SAS Hangar 1), in Eskilstuna and at Kastrup (CPH).
