

# Calibration of Temperature Measurement Equipment

*Calibration of insert sensor*

## Calibration of equipment

FORCE Technology performs accredited calibration of equipment for the measuring and generation of temperature, such as for example:

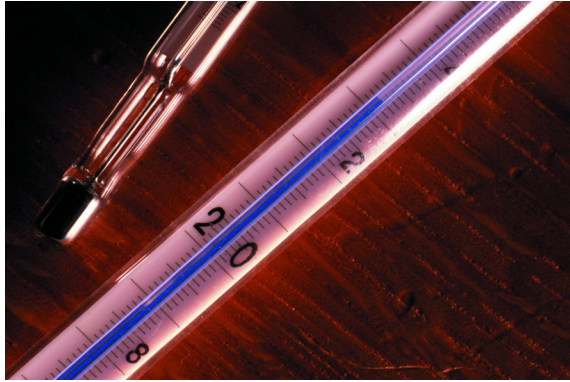

- Glass thermometers
- Dial thermometers
- Capillary thermometers
- Temperature recorders
- Thermographs
- Digital thermometers
- Temperature calibrators
- Pyrometers.

Accredited calibration can be performed in a temperature range of  $-70^{\circ}$  to  $1100^{\circ}$  C.

FORCE Technology's measurement range and measuring capacity has been approved by Danish Accreditation under DANAK Reg. No. 9.

## FORCE Technology certificates

Certificates issued by FORCE Technology following calibration are recognized at both national and international levels.

*Calibration of glass thermometer*

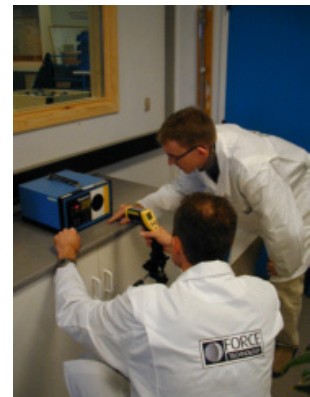

### **Carrying out calibration**

FORCE Technology's accreditation in the temperature area comprises calibration performed either on the customer's premises or in our modern laboratories.

Calibration on customers' premises might for instance involve major processing plants where an instrument cannot be removed from production for several hours.

### **Solving calibration problems**

FORCE Technology is happy to assist with non-binding advice or price quotations for relevant work within both the temperature and other calibration areas.

*Calibration of pyrometer against black-body*

### **Impartiality**

FORCE Technology is an impartial body and has at its disposal a nationwide network of highly qualified inspectors whose expertise may be of great benefit to our customers.
